

Exploring the Benefits of realzinc™ Higiene for ACMV Ducting Systems: A Sharing Session by CSC Steel at MACRA

On 4 April 2023, representatives from CSC Steel visited MACRA to share insights on the benefits of using realzinc™ Higiene- the antimicrobial galvanized iron (GI) sheet for ACMV (air-conditioning and mechanical ventilation) ducting systems.

The representatives discussed the advantages of using antimicrobial GI sheets, which can help to reduce the growth of bacteria and other harmful microorganisms in the ducting system. They also highlighted the potential cost savings and improved health outcomes from using this product.

Overall, the presentation provided valuable information for the MACRA committees to consider as they continue to explore options for improving the safety and efficiency of ACMV systems.
