

CSC Malaysia Double Recognition at ASEAN and National Level in Energy Management

CSC Malaysia (“The Company”) has won the top awards at both the National Energy Awards 2025 (NEA2025) and the ASEAN Energy Awards 2025 (AEA2025) in the Large Industry – Energy Management category.

▲ Mr. Cho, Chun Yi, Group Managing Director of The Company (center), received the Winner Award in the “Large Industry Category” at NEA 2025, presented by Deputy Prime Minister of Malaysia (second from left).

▲ Mr. Cho, Chun Yi, Group Managing Director of The Company (second from right), received the Winner Award in the “Large Industry Category” at AEA 2025, presented by the Undersecretary of State, Ministry of Mines and Energy of Cambodia (second from left).

The Company participated in the **NEA 2025**, spearheaded by the Ministry of Energy Transition and Water Transformation (PETRA) of Malaysia, and was **awarded Winner in Category I: Energy Management – Large Industry**. This achievement qualified The Company to compete at the **AEA 2025**, organized by the ASEAN Centre for Energy (ACE), where it once again won the **award in the Energy Management – Large Industry category**. This dual recognition underscores The Company's unwavering commitment to energy efficiency, reinforcing its position as a regional leader in industrial sustainability and operational excellence.

As a **two-time NEA winner (2019 & 2022)** and Malaysia's top performer at the ASEAN Energy Awards, The Company has consistently demonstrated excellence in energy management. Through the strategic application of advanced technologies, the **ISO 50001 Energy Management System**, a **rooftop solar renewable energy**, and a **comprehensive suite of integrated energy-saving initiatives**, The Company has significantly enhanced operational efficiency while reducing its environmental footprint.

These recognitions further affirm The Company's strong commitment to **Environmental, Social, and Governance (ESG)** principles, which are deeply embedded in its culture and daily operations. By integrating ESG considerations into core business practices, The Company continues to drive innovation, operational efficiency, and sustainability. The Company remains dedicated to advancing low-carbon and digital transformation, optimizing energy efficiency, and contributing meaningfully to a sustainable, technologically empowered industrial future.
